

Installation guide

System requirements

For the installation of the Carrera track planer from www.autorennbahnplaner.de the following minimum system requirements have to be fulfilled:

OS: Microsoft® Windows 7, Vista®, Windows® XP, Windows® 2000,
Processor: Intel® Pentium,
Memory: 64 MB RAM,
Disk space: 5,0 MB,
Screen resolution: 1024 x 768 Pixel.

Download of the setup file

Please download the „setup.exe“ from: www.autorennbahnplaner.de/setup.exe.

There is just one setup file for demo- and full version. Both versions (demo- and full version) are identical. In the demo „mode“ there is a limitation of 20 parts to be set. The limitation of 20 parts in the demo version can be removed by entering the personal license key.

The license key can be ordered at www.autorennbahnplaner.de. There you will also find upcoming updates. Updates are free of charge for registered users.

After the download of the „setup.exe“ the installation can be started by a left double click on the setup file.

Note:

For the installation it is required to be logged in as an administrator. Otherwise the application might not have sufficient rights for writing files to your computer

For all following starts off the application no administrator rights are required as all configuration and user data will be stored in the user directory.

Installation

After starting the setup.exe by a left double click the installation program will guide you through the installation process.

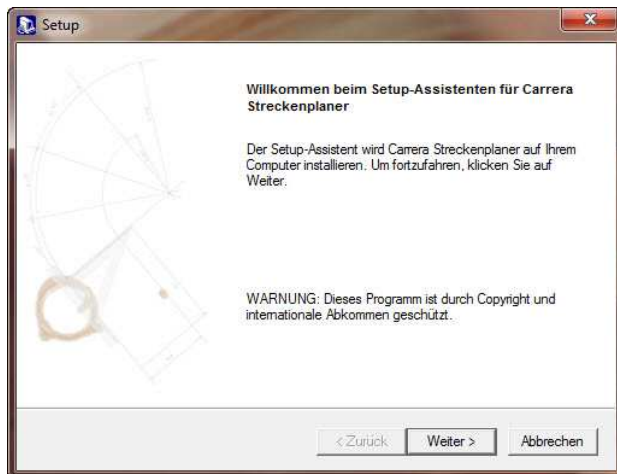

Diagram 1: Installation program

Once you accepted the license agreement (AGB) and skipped the dialog of user name/company in screen two and three of the installation program (not shown here), you can choose the installation directory in screen four or keep the default path.

Diagram 2: Selection of installation folder

The default installation path for Microsoft Windows® is:
C:\Program Files\Carrera Track Planer

After the installation is completed the application can be started by setting the check in the final screen of the application program.

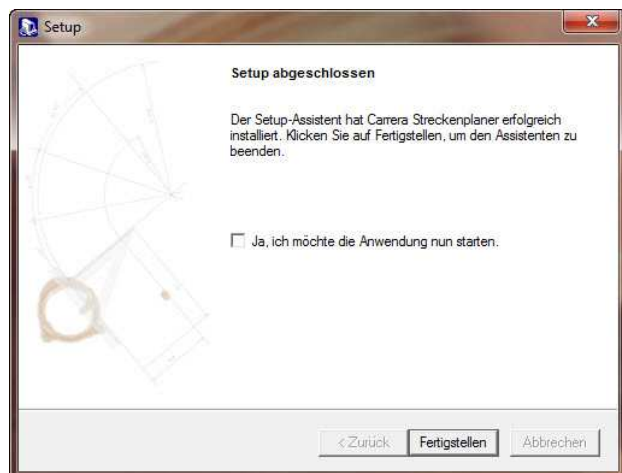

Diagram 3: Final screen of the installation program

Herewith the installation is finished and the application can be started.

Licensing of the full version

After the first installation of the Carrera track planer from www.autorennbahnplaner.de the application will start in demo mode which is limited to 20 parts only.

After the program start you will see the entry dialog for the license key.

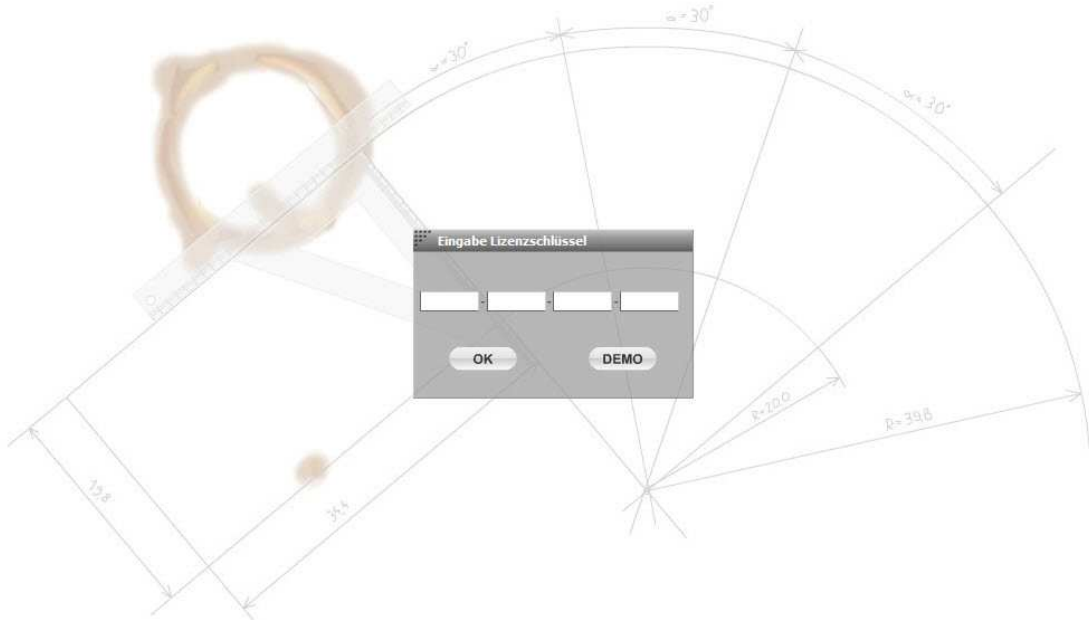

Diagram 4: Dialog license key

After entering your personal license key the limitation of 20 parts from the demo mode is removed and the full version is available. For all following starts the entry dialog for the license key will no longer be shown.

Note:

You will have to enter your personal license key within 3 days after receiving.

After this period it becomes invalid and has to be re-requested (re-requests are free of charge for registered users).

Expired licenses keys can be re-requested at: service@autorennbahnplaner.de
